Our institute is proud of...

1. OPEN UP OUR PUPILS TO THEIR CULTURAL, ECONOMIC, SOCIAL ENVIRONNEMENT

Motivation:

- All the pupils are involved at least once a year in an activity or an event in order to meet other pupils through projects leaded by several high schools ; to meet some professionals and discover activities ; discover their country through day and half-day trips
- Some of them have the opportunity (every two or three years) to benefit a school trip abroad

2. DEVELOPPING THE SELF-ESTEEM OF OUR PUPILS

Motivation:

- They have opportunities to be actively part of some activities that help them to develop or get skills in several fields (dance, slam, poetry, short novels writing, painting, sport, saynettes...etc) and to be proud for themselves and to be a team-member contributing to the group success
- They are offered a range of guidance : psychological support , school tutoring, alternative schooling programs
- Parents are tightly associated in the objective of improving their children self-confidence : they are invited to take part of many extracurricular activities

One challenge that we meet is...

- Eradicate the cases of pupils who drop out

Explanation:

- They represent a small number of our pupils but every year they don't take benefit from the measures we implement
- They drop the school system young and with no qualification.
